

# Ospa BlueCheck Monitoring user licence

## Conditions

### General:

By purchasing the Ospa BlueCheck User Licence, you have acquired access to the Ospa BlueCheck Monitoring platform. The Ospa BlueCheck user licence enables remote monitoring of the Ospa water treatment unit in combination with Ospa BlueControl or Ospa BlueCheck Gateway.

For this purpose, Ospa stores the unit-related data and the operating messages recorded by the Ospa devices, BlueControl or BlueCheck Gateway and makes them available to the licensee on a secure website specially configured for the licensee.

Via the website made available to him, the licensee can monitor the current operating status of his water treatment unit, change the water temperature and adjust the operating status of the water treatment unit, provided that this feature is activated.

### §1

This user licence becomes effective when the Ospa water treatment unit(s) is (are) commissioned and the Ospa BlueControl or BlueCheck Gateway devices have been configured for network connectivity.

### §2

The licensee agrees to the use and conditions and authorises Ospa Apparatebau Pauser GmbH & Co.KG, hereinafter referred to as "Ospa", to process and store the data recorded and transferred by the Ospa devices and their operating messages.

### §3

The licensee provides the connection between the router or switch and the Ospa BlueControl or BlueCheck Gateway components in his/her local area network (LAN) so that the data and operating messages recorded by the Ospa devices and components can be transferred to the Ospa BlueCheck Monitoring platform. The Licensee is responsible for the correct functioning of this local network connection.

### §4

If, due to interruptions in the data connection, regardless of the location of the disruption, data is not transferred and thus not stored on BlueCheck or if data is not transferred correctly and thus stored incorrectly, Ospa cannot be held responsible for this nor can any kind of warranty be assumed.

### §5

Ospa aims to ensure availability of the data. However, Ospa cannot exclude the possibility of data loss due to maintenance work on the software and server. In case of significant data loss, the licensee will be informed.

### §6

If the licensee entrusts a partner company of Ospa, which has the necessary capabilities, with the remote control of its Ospa water treatment unit, Ospa requires a written declaration for forwarding the data to the partner company.

### §7

This user licence is valid until it is replaced by another BlueCheck user licence and as long as the licensee is the owner of the Ospa water treatment unit. The licensee agrees to immediately inform Ospa of any change of ownership.

### §8

The general terms and conditions of Ospa Apparatebau Pauser GmbH&Co.KG apply
